Weekly Homework Tasks

Key Stage 2 Year 4

W/C 24.2.18

Homework books **must be in school on Monday** and it will be returned on Tuesday

Reading

Please read aloud to an adult every day. Write a summary of what you have read or discuss the story with an adult. Please record in your reading record book the pages that you have read each day. **Remember to bring your book and reading record to school every day.** Please visit Nelson School Library or East Ham Library for your reading wristband books.

Maths

Please practise your **Maths facts**: ready for your **test on Friday**.

Sums and differences of multiples of 10 up to 100

This is about knowing all the pairs of numbers that can be added together to make 100, e.g.

$$63 + 37 = 100$$

$$25 + 75 = 100$$

This is really useful when you need to work out change from £1.

You could:

Ask: What must you add to 62p to make £1?

Ask: I cut 35 cm off a 1m long piece of string. How much is left?

Spelling –

- 1) You must **ensure you know the meaning of the new words**. -use a dictionary to help you if you are unsure.
- 2) **Write a sentence for each of the new words**. You can include more than one word in a sentence as long as it makes sense and shows that you understand the word. You do not need to write a sentence for revision spellings.
- 3) **Practise and study all of the spelling words ready for the Weekly Spelling Test.**

Terrific Teeth

The part of the tooth you can see is called the **crown**. The crown of each tooth is covered with **enamel**, which is very hard. Enamel is a tough substance that works as a barrier, protecting the inside parts of the tooth.

If you were able to peel away the enamel, you would find **dentine**. Dentine makes up the largest part of the tooth. Although it is not as tough as enamel, it is also very hard.

Dentine protects the innermost part of the tooth, called the **pulp**. The pulp is where each tooth's nerve endings and blood supply are found. When you eat hot soup, bite into a super-cold scoop of ice cream or fall and hurt a tooth, it's your pulp that hurts. The nerve endings inside the pulp send messages to the brain about what's going on. The pulp also contains the tooth's blood vessels, which feed the tooth and keep it alive and healthy.

The pulp goes all the way down into the root of the tooth, which is under the gum. **Cementum** makes up the root of the tooth, which is anchored to the jawbone.

. Look at the section 'Terrific Teeth'

What is the crown of each tooth covered with? Tick one.

Tick one

dentine

pulp

enamel

In paragraph one - find and copy **one** word that means the same as *strong material*

In paragraph three - find and copy **one** word that means the same as the *inside parts*

In paragraph four - find and copy **one** word that means the same *fixed*
