

## Matching pegs

This activity can support fine motor skills, hand eye co-ordination, colour awareness.

### You will need:

1. Coloured pegs from your washing line (these can also be brought from supermarkets, pound shops or small local hardware shops).
2. Coloured pieces of card.

If you cannot get coloured pegs you can use plain pegs and number them or just simply allow your child to peg plain pegs onto a piece of card or paper or around the edge of a plastic plate.

### Instructions:

Place all the pegs and card into a container, this will help your child see exactly what they have to do for this activity.

Allow the child to open the container and support/teach them to match the correct pegs to the correct card, if using plain pegs you can teach them to 'pinch' the pegs and place them on the plain card.

**Once all the pegs are matched on the card then the activity is finished.**
